Global Mobility Services (GMS) is a sector focused on managing and optimizing the movement of employees across borders for international business operations. It encompasses various services designed to support organizations in navigating the complexities of global talent mobility. Here are key insights into the business of GMS:

Core Services

1. **Tax Compliance and Advisory**: Assisting companies with tax planning, compliance, and reporting for employees working internationally. This includes managing tax obligations in both the home and host countries.

2. **Immigration Services**: Facilitating work visas, permits, and residency for employees relocating to different countries.

3. **Compensation and Benefits** Designing compensation packages that consider exchange rates, cost of living adjustments, and tax implications for expatriates.

4. **Relocation Support**: Managing logistics such as housing, schooling, and orientation services to ensure smooth transitions for employees and their families.

5. **Risk Management and Compliance**: Ensuring that companies adhere to local labor laws, social security regulations, and other compliance requirements.

Market Trends

Digital Transformation: Increasing use of technology platforms to manage mobility programs, including tracking employee locations, managing compliance, and automating processes.

Focus on Employee Experience: Companies are placing more emphasis on the well-being and satisfaction of their mobile workforce, recognizing the impact on productivity and retention.

Sustainability Concerns: Businesses are increasingly considering the environmental impact of global mobility, leading to a rise in remote work options and reducing the need for physical relocation.

Regulatory Changes: The global regulatory landscape is constantly evolving, with new immigration policies, tax laws, and compliance requirements emerging, driving demand for GMS services.

Challenges

Complex Regulatory Environment: Navigating different tax laws, immigration policies, and labor regulations across multiple jurisdictions is complex and requires specialized expertise.

Cost Management: Balancing the costs of expatriate assignments, including relocation, taxes, and compensation, while maintaining competitiveness, is a significant challenge.

Cultural and Language Barriers: Ensuring that employees adapt to new cultures and languages, which can affect both their personal and professional lives, is a critical aspect of GMS.

Growth Opportunities

Expansion into Emerging Markets: As companies expand into new regions, the demand for GMS services in emerging markets is expected to grow.

Advisory Services: Offering strategic advice on global talent management, workforce planning, and organizational design to optimize the deployment of talent globally.

Technology Integration: Developing and implementing advanced technologies such as AI and data analytics to enhance service delivery and provide deeper insights into mobility trends and performance.

Key Players

- **GMS, Santa Fe, Graebel, SIRVA Worldwide, Weichert Workforce Mobility, NEI Global Relocation, CapRelo, Aires, Sterling Relocation, Altair Global Relocation, BGRS, Cartus, Crown World Mobility, AMJ Campbell, CBRE Group, Plus Relocation, FIDI, MSIGTS, AssureShift, Interem Relocations**

- Major consulting and accounting firms such as Deloitte, PwC, KPMG, and EY are leading providers of GMS, offering comprehensive solutions that integrate tax, legal, and HR services.

- Specialized firms focus on specific aspects of global mobility, such as immigration, relocation, or tax compliance.

Global Mobility Services is a dynamic field that plays a crucial role in supporting international business operations, with growing importance due to the increasing globalization of the workforce.

Movement & Logistics Services

1. Packing Services
   a) Professional Packing
   b) Labelling & Inventory
   c) Fragile Item-care
2. Transportation – via road, rail sea, air
3. Unpacking and Set-up
4. Insurance and Risk Management
5. Specialized Services – special items-handling; climate-controlled transportation

---

GLOSSARY – GLOBAL MOBILITY

S.No.	Term	Definition
1	Assignment	Temporary international work placement of an employee in another country.
2	Assignee	Employee who is sent on an international assignment.
3	Assignment Letter	Official document outlining assignment terms, duration, benefits, and responsibilities.
4	Assignment Lifecycle	Stages: planning, deployment, ongoing support, repatriation.
5	Short-Term Assignment (STA)	Assignment up to 12 months, usually without family move.
6	Long-Term Assignment (LTA)	Assignment typically 1–5 years with full relocation support.
7	Permanent Transfer	Employee is moved permanently to host country.
8	Commuter Assignment	Employee travels frequently between home and host locations.
9	Rotational Assignment	Fixed rotation schedule; common in oil & gas.
10	Business Travel	Short travel requiring compliance for visas and taxes.
11	Business Traveller Compliance	Ensuring business travellers meet visa, tax, immigration rules.
12	Home Country / Host Country	Origin vs. destination of assignment.
13	Relocation (Relo)	End-to-end movement of employee and household.
14	Pre-departure Services	Orientation, visa, cost estimate, training.
15	Destination Services (DSP)	Local support for housing, schooling, settling.
16	Allowances	Additional payments or benefits during assignment (COLA, hardship, etc.).
17	Hardship Allowance	Extra pay for challenging or high-risk locations.
18	Cost of Living Allowance (COLA)	Allowance to equalize living costs.
19	Hardship Allowance	Compensation for difficult locations.
20	Location Allowance	Additional pay due to geographic differences.
21	Home-Based Pay	Salary structure tied to home country.
22	Host-Based Pay	Salary aligned to host country's market.
23	Work Permit	Authorization to work in destination.
24	Residence Permit	Authorization to live in host country.
25	Apostille / Legalization	Document authentication.
26	Tax Equalization	Ensures employee pays similar tax as home country.
27	Tax Protection	Company compensates if host tax exceeds home tax.
28	Shadow Payroll	Payroll reporting in host country while paid in home country.
29	Split Payroll	Salary divided between home and host payrolls.
30	Permanent Establishment (PE) Risk	Risk of creating taxable presence abroad.
31	Household Goods (HHG) Shipment	Movement of personal belongings.
32	Temporary Accommodation	Short-term stay until housing is secured.
33	Storage-in-Transit (SIT)	Temporary storage of goods.
34	School Search Assistance	Support in finding schools.
35	Cultural Training	Training for adapting to host culture.
36	Language Training	Learning host-country language.
37	RMC (Relocation Management Company)	Company managing mobility services.
38	DSP (Destination Service Provider)	On-ground relocation support vendor.
39	Service Level Agreement (SLA)	Service quality contract.
40	Assignment Cost Projection (ACP)	Cost estimate for international assignment.
41	Per Diem	Daily allowance for meals and incidentals.
42	Lump Sum Move	Fixed amount paid for relocation needs.
43	Mobility Management Platform	Tool for managing relocation cases.
44	Case Management	Tracking relocation activities.
45	Employer of Record (EOR)	Hiring employees without local entity; Third-party entity legally employing workers abroad.
46	Duty of Care	Employer responsibility for assignee safety.
47	Move Management	Coordinating household goods shipping and logistics.

GLOSSARY – INTERNATIONAL LOGISTICS

S.No.	Term	Definition
1	Bonded Warehousing	Storage facility where imported goods can be stored without paying duties until they are released.
2	Cargo Insurance	Protection against financial loss due to damage or loss of goods during transit.
3	Cold Chain Logistics	Temperature-controlled supply chain for perishable goods like food and pharmaceuticals.
4	Consolidation Services	Combining smaller shipments into one larger shipment to reduce costs.
5	Cross-Docking	Distribution system where products are unloaded from inbound transport and directly loaded onto outbound transport.
6	Customs Brokerage	Assistance with clearing goods through customs by preparing documentation and paying duties/taxes.
7	Customs Clearance	Official approval for goods to enter or leave a country after duties and taxes are paid.
8	Deconsolidation Services	Breaking down large shipments into smaller ones for distribution.
9	Distribution Services	Delivery of goods from warehouses to retailers or customers.
10	Door-to-Door Shipping	Service where goods are picked up at the origin and delivered directly to the destination.
11	Drop Shipping	Retail fulfillment method where a store doesn't keep products in stock but ships directly from supplier to customer.
12	Fourth-Party Logistics (4PL)	A logistics provider that manages and integrates multiple 3PLs and supply chain services.
13	Freight Forwarding	Service that organizes shipments for individuals or companies to get goods from manufacturer to market.
14	Intermodal Transport	Movement of goods using multiple modes of transport (e.g., ship, rail, truck) without handling cargo itself.
15	Last-Mile Delivery	The final step of the delivery process from a distribution center to the end customer.
16	Multimodal Transport	Use of more than one mode of transport under a single contract.
17	Reverse Logistics	Process of moving goods from customers back to sellers or manufacturers (returns, recycling).
18	Supply Chain Management (SCM)	Coordination of production, shipment, and distribution of products.
19	Third-Party Logistics (3PL)	Outsourcing logistics operations such as warehousing, transportation, and distribution to a specialized provider.
20	Warehousing Services	Storage and handling of goods before distribution.

Multimodal Transport | Sea, Air and Road

Sea Cargo handling is a crucial part of international relocation services. An overview:

A. Pre-Shipment –

1. **Booking and Documentation**: The relocation company books space on a shipping vessel and prepares necessary documents, such as the Bill of Lading and Commercial Invoice.

2. **Packaging and Labelling**: Goods are carefully packed and labelled for safe transportation.

B. Port Handling -

1. **Port Pickup**: Goods are collected from the origin and transported to the port of departure.

2. **Customs Clearance**: The relocation company handles customs clearance procedures, ensuring compliance with regulations.

3. **Loading and Stowage**: Goods are loaded onto the shipping vessel and secured for safe transit.

C. Transit -

1. **Vessel Tracking**: The relocation company tracks the vessel's progress and keeps clients informed.

D. Discharge and Delivery -

1. **Port Discharge**: Goods are discharged at the port of arrival.

2. **Customs Clearance**: The relocation company handles customs clearance procedures at the destination port.

3. **Delivery**: Goods are transported to the client's new location.

Shipping Vessels

Relocation companies use various types of shipping vessels to transport goods, depending on the route, cargo type, and client needs. Here are some common types:

S.No.	Type of Shipping Vessel	Description	Length Range
1	**Container Ships**	These are the most common vessels used for international relocation. They carry cargo containers of various sizes (20ft, 40ft, etc.)	100m to 400m (328ft to 1,312ft) - ***Small Feeder***: 100m-200m (328ft-656ft) - ***Medium Feeder***: 200m-300m (656ft-984ft) - ***Large Container Ship***: 300m-400m (984ft-1,312ft)
2	**Roll-On/Roll-Off (Ro-Ro) Ships**	Designed for wheeled cargo like cars, trucks, and heavy machinery.	100m to 250m (328ft to 820ft)
3	**Breakbulk Ships**	Carry cargo that is not containerized, such as oversized or heavy items.	50m to 200m (164ft to 656ft)
4	**Heavy Lift Ships**	Specialized vessels for oversized or heavy cargo that exceeds standard container limits.	100m to 300m (328ft to 984ft)
5	**Project Cargo Ships**	Designed for complex, high-value cargo like industrial equipment or large projects.	100m to 300m (328ft to 984ft)

Categories:

S.No.	Category	Capacity
1	Handysize	10,000-40,000 DWT (Deadweight Tonnage)
2	Handymax	40,000-60,000 DWT
3	Supramax	50,000-60,000 DWT
4	Panamax	60,000-80,000 DWT
5	Post-Panamax	80,000-120,000 DWT
6	Cape Size	120,000-200,000 DWT
7	Very Large Crude Carrier (VLCC)	200,000-320,000 DWT
8	Ultra Large Crude Carrier (ULCC)	320,000+ DWT

Note: DWT (Deadweight Tonnage) is a measure of a ship's cargo capacity.

Shipping Options:

A. Full Container Load (FCL): Exclusive use of a container for a single shipment. Ideal for large or heavy cargo.

B. Less than Container Load (LCL): Shared container space for multiple shipments. Cost-effective for smaller cargo.

C. Door-to-Door (D2D): Goods are picked up from the origin and delivered directly to the destination.

D. Door-to-Port (D2P): Goods are picked up from the origin and delivered to the port of departure.

E. Port-to-Port (P2P): Goods are shipped from the port of departure to the port of arrival.

F. Port-to-Door (P2D): Goods are picked up from the port of arrival and delivered to the destination.

Additional Services:

- **Packing and Crating:** Professional packing and crating services for safe transportation.

- **Insurance**: Optional insurance coverage for goods during transit.

- **Tracking**: Real-time tracking and monitoring of shipments.

- **Customs Clearance**: Assistance with customs clearance procedures.

Vessel Options:

- **Economy**: Slower transit times, cost-effective option.

- **Express**: Faster transit times, priority handling.

- **Premium**: High-priority handling, door-to-door delivery.

Air Cargo plays a vital role in global mobility services, offering fast and reliable transportation of goods and personal effects.

Key Aspects

1. Booking and Documentation: Shippers book space on flights and prepare necessary documents, such as the Air Waybill (AWB).

2. Cargo Acceptance: Goods are accepted at the airline's cargo terminal, where they are inspected and weighed.

3. Security Screening: Cargo undergoes security screening and screening procedures.

4. Specialized Equipment: Airlines and handlers use equipment like:

- Pallets and nets
- Containers (ULD - Unit Load Devices)
- Forklifts and tugs
- Cranes and hoists

5. Loading and Securing: Cargo is loaded onto the aircraft, secured with straps or nets.

6. Flight Operations: Cargo is transported to the destination.

Types of Air Cargo Services

1. Express: Time-sensitive cargo, often door-to-door delivery.

2. Priority: Fast and reliable service, often used for high-priority shipments.

3. Economy: Cost-effective option, suitable for non-time-sensitive cargo.

Benefits

1. Speed: Fast transportation, often within 24-48 hours.

2. Reliability: Scheduled flights and tracking ensure reliable delivery.

3. Security: Air cargo is generally considered secure, with strict screening procedures.

Common Air Cargo Types

1. General Cargo: Personal effects, documents, and general merchandise.

2. Special Cargo: Oversized, heavy, or sensitive items (e.g., electronics, art).

3. Perishable Cargo: Temperature-controlled goods (e.g., food, pharmaceuticals).

4. Dangerous Goods: Hazardous materials (batteries, chemicals).

Services

1. Door-to-Door: End-to-end logistics, including pickup and delivery.

2. Customs Clearance: Assistance with customs procedures and regulations.

3. Tracking: Real-time tracking and monitoring of shipments.

Regulations

1. IATA: International Air Transport Association sets standards.

2. ICAO: International Civil Aviation Organization regulates air transport.

3. Customs Regulations: Vary by country, govern imports/exports.

Operational Challenges

1. Space Constraints: Limited space at airports and on aircraft.

2. Weight and Balance: Ensuring cargo is loaded to maintain aircraft balance.

3. Handling Complexity: Oversized or heavy cargo requires specialized equipment and expertise.

Regulatory Challenges

1. Security Regulations: Compliance with strict security procedures.

2. Customs Regulations: Varying regulations across countries.

3. Dangerous Goods Regulations: Handling hazardous materials.

Logistical Challenges

1. Route Planning: Finding suitable aircraft and routes for large cargo.

2. Ground Handling: Coordinating ground handling and transportation.

3. Weather Conditions: Managing delays or disruptions due to weather.

Cost and Efficiency Challenges

1. High Costs: Specialized equipment and handling increase costs.

2. Fuel Efficiency: Optimizing fuel consumption for heavy or oversized cargo.

3. Time-Sensitive: Managing tight schedules and deadlines.

Examples of Challenging Cargo

1. Aircraft Engines: Large, heavy, and complex to handle.

2. Wind Turbines: Oversized and require specialized equipment.

3. Heavy Machinery: Requires careful planning and handling.

Road Transportation is a crucial part of global mobility services, connecting businesses and individuals across cities and countries. An overview:

Key Aspects

1. Fleet Management: Companies manage fleets of vehicles, ensuring they are maintained and equipped for cargo.

2. Route Planning: Optimal routes are planned, considering factors like traffic, weather, and road conditions.

3. Cargo Handling: Goods are loaded, secured, and transported to destinations.

Types of Road Transportation

1. Full Truck Load (FTL): Exclusive use of a truck for a single shipment.

2. Less than Truck Load (LTL): Shared truck space for multiple shipments.

3. Specialized Transport: For oversized, heavy, or sensitive cargo (e.g., refrigerated goods).

Services

1. Door-to-Door: End-to-end logistics, including pickup and delivery.

2. Terminal-to-Terminal: Cargo is transported between terminals or hubs.

3. Express: Time-sensitive cargo, often with guaranteed delivery times.

Benefits

1. Flexibility: Road transport can adapt to changing needs and routes.

2. Cost-Effective: Often more affordable than air or sea transport for shorter distances.

3. Convenience: Door-to-door services simplify logistics.

Technology

1. GPS Tracking: Real-time tracking of shipments.

2. Route Optimization: Software optimizes routes, reducing fuel consumption and time.

3. Digital Freight Platforms: Online platforms connect shippers with carriers.

Challenges

1. Traffic and Weather: Delays due to traffic, weather, or road conditions.

2. Regulations: Compliance with regulations, like hours of service, weight limits.

3. Security: Ensuring cargo safety and security.

Trends

1. Sustainability: Focus on reducing emissions, using alternative fuels.

2. Automation: Autonomous vehicles, platooning, and route optimization.

3. Digitalization: Increased use of digital platforms and data analytics.

Container Types

1. Dry Containers: Standard containers for dry goods (20ft, 40ft).

2. Reefer Containers: Temperature-controlled for perishable goods.

3. Open Top Containers: For oversized or heavy cargo.

4. Flat Rack Containers: For heavy or oversized items without sides.

Container Sizes

1. 20ft Containers: Typically 20' x 8' x 8'6" (6.1m x 2.4m x 2.6m).

2. 40ft Containers: Typically 40' x 8' x 8'6" (12.2m x 2.4m x 2.6m).

Road Transportation Modes

1. Container Trucks: Specialized trucks for container transport.

2. Semi-Trailers: Common for container transport, often used for FTL (Full Truck Load).

3. Tractor-Trailer Combinations: For longer distances, often used for LTL (Less than Truck Load).

Key Considerations

1. Weight Limits: Compliance with weight limits, often 20-40 tons.

2. Size Restrictions: Ensuring containers fit on roads and bridges.

3. Route Planning: Optimizing routes for container transport.

Equipment

1. Container Chassis: Specialized trailers for container transport.

2. Twistlocks: Secure containers to chassis or trailers.

3. Lifting Equipment: Cranes, forklifts for loading/unloading containers.

Shifting and transportation of household goods is a crucial part of global mobility services, ensuring a smooth transition for individuals and families relocating internationally. Overview:

Services

1. Packing and Crating: Professional packing and crating of household goods.

2. Loading and Transportation: Loading goods onto containers or trucks, transporting to destination.

3. Unloading and Unpacking: Unloading and unpacking goods at destination.

Types of Shipments

1. Door-to-Door: Goods are picked up from origin and delivered to destination.

2. Port-to-Port: Goods are shipped from port to port, with customs clearance at both ends.

Container Options

1. 20ft Container: Suitable for 1-2 bedroom apartments.

2. 40ft Container: Suitable for 3-4 bedroom houses.

Services Included

1. Customs Clearance: Assistance with customs procedures and regulations.

2. Insurance: Optional insurance coverage for goods during transit.

3. Storage: Optional storage facilities for goods before or after shipment.

Key Considerations

1. Inventory Management: Detailed inventory of goods, tracking and monitoring.

2. Packing and Protection: Proper packing and protection of fragile or sensitive items.

3. Regulations Compliance: Compliance with regulations, customs, and destination country rules.
